LAUNDROMATS

 **DANUBE**
ONNERA GROUP

EFFICIENCY...

and sustainability for an
eco-friendly balance.

Water

Our machines incorporate technology to manage water recovery, guaranteeing optimum use of water in every wash cycle.

Energy

Energy optimisation is an essential part of laundry management to ensure greater savings and efficiency.

Chemicals

Adapting the quantity of detergent to the load and the laundry means extra savings, better laundry care and respect of the environment.

Time

By adjusting process times appropriately, laundry efficiency and profitability are increased.

CONNECTIVITY

with IoT platform

DANUBE ONLINE is DANUBE's free standard platform for centralising your laundry management via the IoT to monitor, control and optimise your machines and resources remotely, in real time, wherever you are, using a computer, tablet or Smartphone.

Universal and easy to use

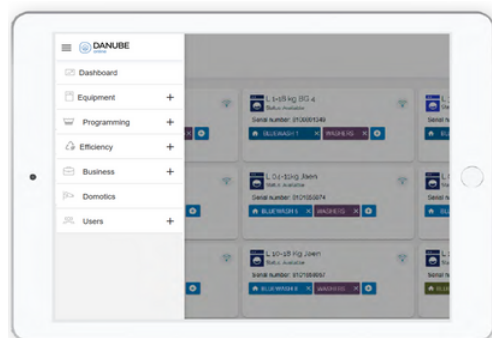

Central, intuitive, multilingual and upgradeable interface.

Secure connection

Protection of data in their availability, integrity and confidentiality.

Useful to all

Operator, maintenance service, distributor and chemicals partner.

INTELLIGENT LAUNDRY

by Danube

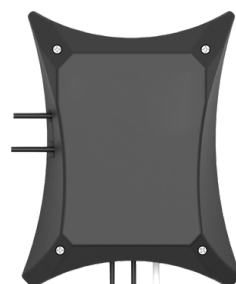

Efficient machines + solutions

The all-in-one concept to optimize all your laundry operations. Combined with the **LEMS by Onnera** system, it allows you to :

1.- collect precise data from different **LEMS Counter Box** installed on each machine (water, gas and electricity consumption in real time),

2.- retrieve this data using the **LEMS Brain** pulse concentrator which automatically transmits it to the **DANUBE ONLINE** platform via IoT.

All you have to do is log in to your account on the DANUBE ONLINE platform to manage your laundry and generate personalized reports on efficiency and hygiene.

Precise management

Optimized efficiency

Controlled hygiene

THE SELF-SERVICE SECTOR

Why create a laundromat?

- Part of the population does not have a washing machine, by choice or by lack of space.
- Some textile items are too bulky or too large to be washed at home (duvets, curtains, rugs, etc.).
- A laundromat saves time and money for people who can wash 20 kg of laundry in an hour.

In any case, there are solutions adapted to each type of self-service laundry, they should be studied carefully to offer the best service and satisfaction that your customers expect.

What advantages does a laundromat provide?

- Comfort for customers: their laundry is washed and dried with professional machines offering short cycles.
- Saving time and money for a larger volume of laundry to be processed in one go.
- Ease and security of payment for customers and owners alike.

A STUDIED INVESTMENT

Coin-operated washers, dryers, and other laundry equipment are **in constant demand**, whether in laundromats, residences or resorts.

It is therefore essential that the equipment meets criteria of efficiency, speed and robustness. **Optimizing processes while ensuring exemplary hygiene** is the key a laundromat's success with customers.

Two versions of laundromat are possible:

- **In store:** carried out according to premises, geographical location, type of equipment to meet the specific needs of the project.
- **In a bungalow:** designed turnkey, to be installed in the location of your choice.

Why choose Danube?

- Reliable washing and drying with suitable machines.
- Secure multi-payment system.
- Useful accessories (dosing pump kit, tables, etc.) and innovative design for smooth processes.
- Close after-sales service.

BlueWashBox by Danube

Fully equipped containers!

Danube offers modules of different sizes allowing several configurations of connected machines.

Ideal for many applications, whether for permanent installation (supermarkets, gas stations, mining sites, etc.) or temporary (military camps, natural disasters, fire zones, etc.).

**BUNGALOW
5 AND 6,6 M**

COMPACT BLUEWASHBOX

3 M including:

- 1 x 18 kg dryer
- 1 x 18 kg washer
- 1 x 10 kg washer

A wide range:

Front washers

- **High spin WED**
from 10 to 45 kg

Equipped with the ET2 control like the WED range, but anchored to the floor, with a G factor of 200, the WEN range can meet all types of hygiene and washing requirements.

This range is particularly appreciated for cleaning pets textiles (special machine) because it can be equipped with the sluice option (8 mm drum perforations for better evacuation).

- **Normal spin WEN**
from 11 to 80 kg

DD Tumble dryer

single drum

- **DD - SILVER**

from 11 to 35 kg

The **SILVER** range is the most versatile and equally efficient since it offers numerous of options to adapt exactly to the requirements.

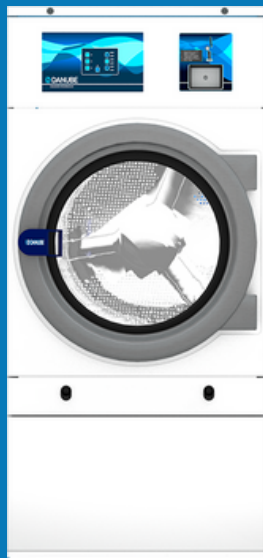

It is controlled by the ET2 control, fully programmable.

Note for this range: the perfume dosing / spraying system for fresh and soft laundry.

STD Stack dryer + double drum

- **DD - BRONZE**

- **DD - BASIC**

from 11 to 35 kg

the **BRONZE** and **BASIC** ranges, equipped with simple EM electronic control to select time and temperature, also offer quality services for a lower budget.

- **STD-XP SILVER ET2**

also **BRONZE** and **BASIC**

from 11 to 22 kg

Ozone cabinets

Designed to **deodorize** and **sanitize** all kinds of clothing, accessories and materials using ozone, the DAN_O3 cabinets are the ideal complement to laundromats. Clothing and accessories are disinfected naturally, without chemicals, very easily.

- **DAN_O3**

313 litres

- **DAN_O3**

1252 litres

- **DAN_O3**

626 litres

Other accessories...

DANUBE LAUNDRY KIOSK

A new centralised payment system that connects to machines via Ethernet or pulses, it offers contactless payment by card, smartphone or other smart devices (NFC).

Equipped with an intuitive touch screen, it enhances the user experience and enables owners to manage and control their laundries remotely.

- **DANUBE LAUNDRY KIOSK 12**

Screen 12"

- **DANUBE LAUNDRY KIOSK 32**

Screen 32"
